HUMAN VALUES

Basic Sanitation
 Sanitation is yet another problem, but one of the big ones in India. There are about 700 million people who have no toilets at home. Many of these people do not have toilets, and are thus forced to defecate in the open. This causes numerous diseases like cholera, typhoid, dehydration etc. Even schools also have no toilets, because of which parents do not send their kids, especially girls, to school. Some attention was drawn towards this problem in the 1990s but nothing much was done.

CHILD LABOUR
 Child Labour refers to the exploitation of children through any form of work that deprives children of their childhood, their potential and their dignity that is harmful to physical and mental development. "The life of little ones are destroyed when child labor is introduced."

Poverty
 The population of India living below the poverty line declined from 37% in 2004-2005 to 22% in 2011-12. In 2011-2012, 22% of the population lived in extreme poverty. This figure is expected to decline to 5% by 2022, as per world poverty clock estimate. This disparity needs immediate attention of the government.

Corruption
 The most widely spread endemic in India is corruption, which must be handled quickly and wisely. There is hardly any office, in both the private and public sector, that is untouched from this disease. There is no telling how much loss the economy has suffered because of this. Though most of us are concerned when the time comes to act, we the people of India, should not be found lacking.

Agricultural distress
 India is a country which is widely famous for its agriculture throughout the world. But the sad plight of our farmers is in the fact that they farmers face too many problems such as lack of basic amenities of irrigation system, agricultural implements and short or long-term loans. The exploitation of farmers at the hands of moneylenders is a very prominent and common issue that immediately needs to be looked into.
