## Process/Procedures integrating IT

Examination Management System is designed to accomplish and monitor the examination activities. The ERP software is used to manage the complete examination process of the institution. It includes all exam-related activities, such as online quiz, mark entries, examination registration, fee payment, seating arrangements, Hall Tickets, Results, Generation of statement of marks, calculation of Course Outcome attainment, online verification, graduate exit survey etc. The faculty and the students can login to access and know the details of their marks, question bank, semester questions and also download their requirements. The EMS helps to streamline the examination schedule, conduction, and result declaration process while ensuring 100% accuracy of results.
